

our group packages

We want to offer the most fitting learning experience for you and your team. This is why we have developed three different models that are designed to bring our content into line with your interests and group size. In order to facilitate easy handling, we have also developed a platform model that is specifically designed to enable autonomous management of your group.

Learning as easy as counting...

What began eight years ago with a webcam, a canvas serving as a simple backdrop, and a passion for teaching echocardiography has evolved into the global No.1 platform for learning medical ultrasound and echocardiography.

Our commitment to produce high-quality videos through proven didactic methods and our enthusiasm for the latest digital technology were important contributors to this achievement. But even more so, it was the unwavering support from our global community of healthcare professionals that paved the way to our success. The overwhelmingly positive feedback and encouragement we receive daily has propelled us forward, inspiring us to produce content that enables doctors and sonographers to meet their patients' needs, no matter the situation.

Medical ultrasound is the fastest growing imaging modality in medicine and each passing year brings stunning advancements, transforming a technology that began with limited use into an increasingly sophisticated modality with applications across diverse areas of medicine. At the same time, the advent of mobile and handheld devices is bringing ultrasound to the forefront of medicine, expanding the use of ultrasound far beyond traditional settings.

But all of these developments would be misguided without effective, affordable education that is universally available. Education that distills the very latest knowledge into an easily digestible form and enhances the way we achieve mastery over our professions. It is for this reason that we will remain committed to the development of innovative online education far into the future, ultimately to the benefit of you and your patients.

We look forward to seeing you there.

Yours,
Prof. Thomas Binder, MD

123Partner – Platform

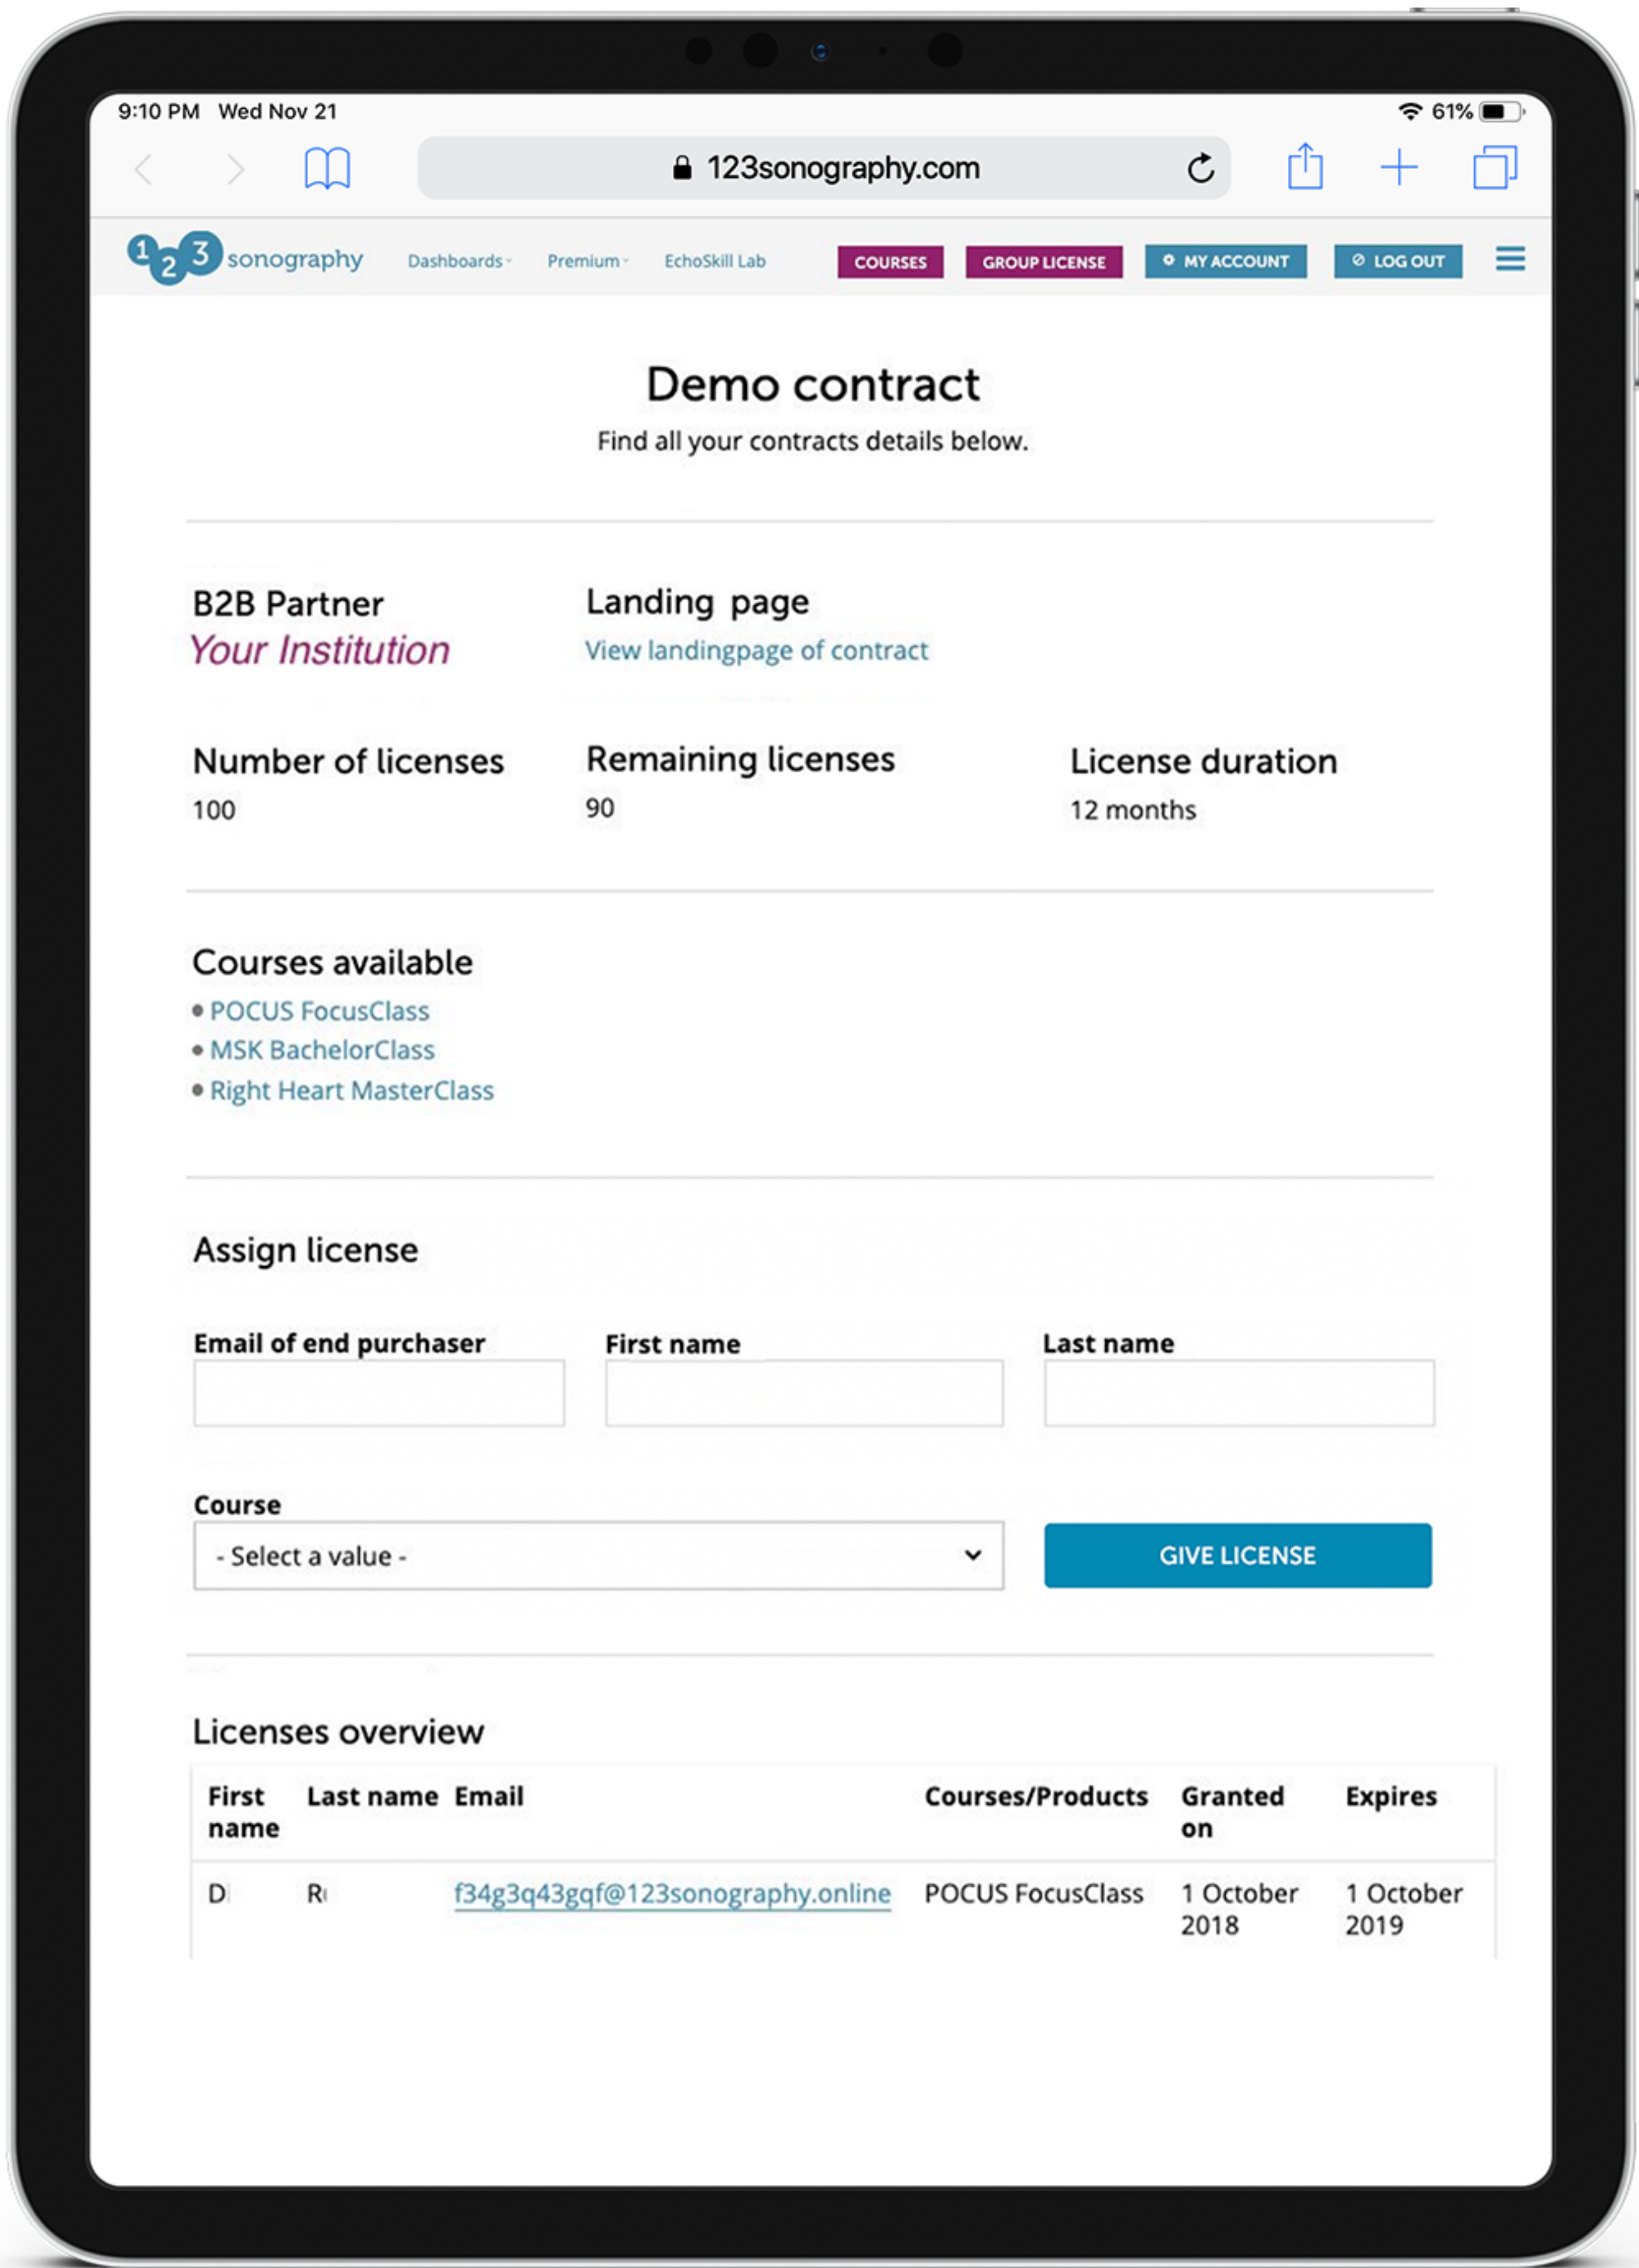

If you choose Institutional Access Classic or Institutional Access Custom we will generate a customized partner platform for you and your end-users. Your partner platform will include a unique admin page for your administrators and a landing page for your learners.

Benefits of the admin page include

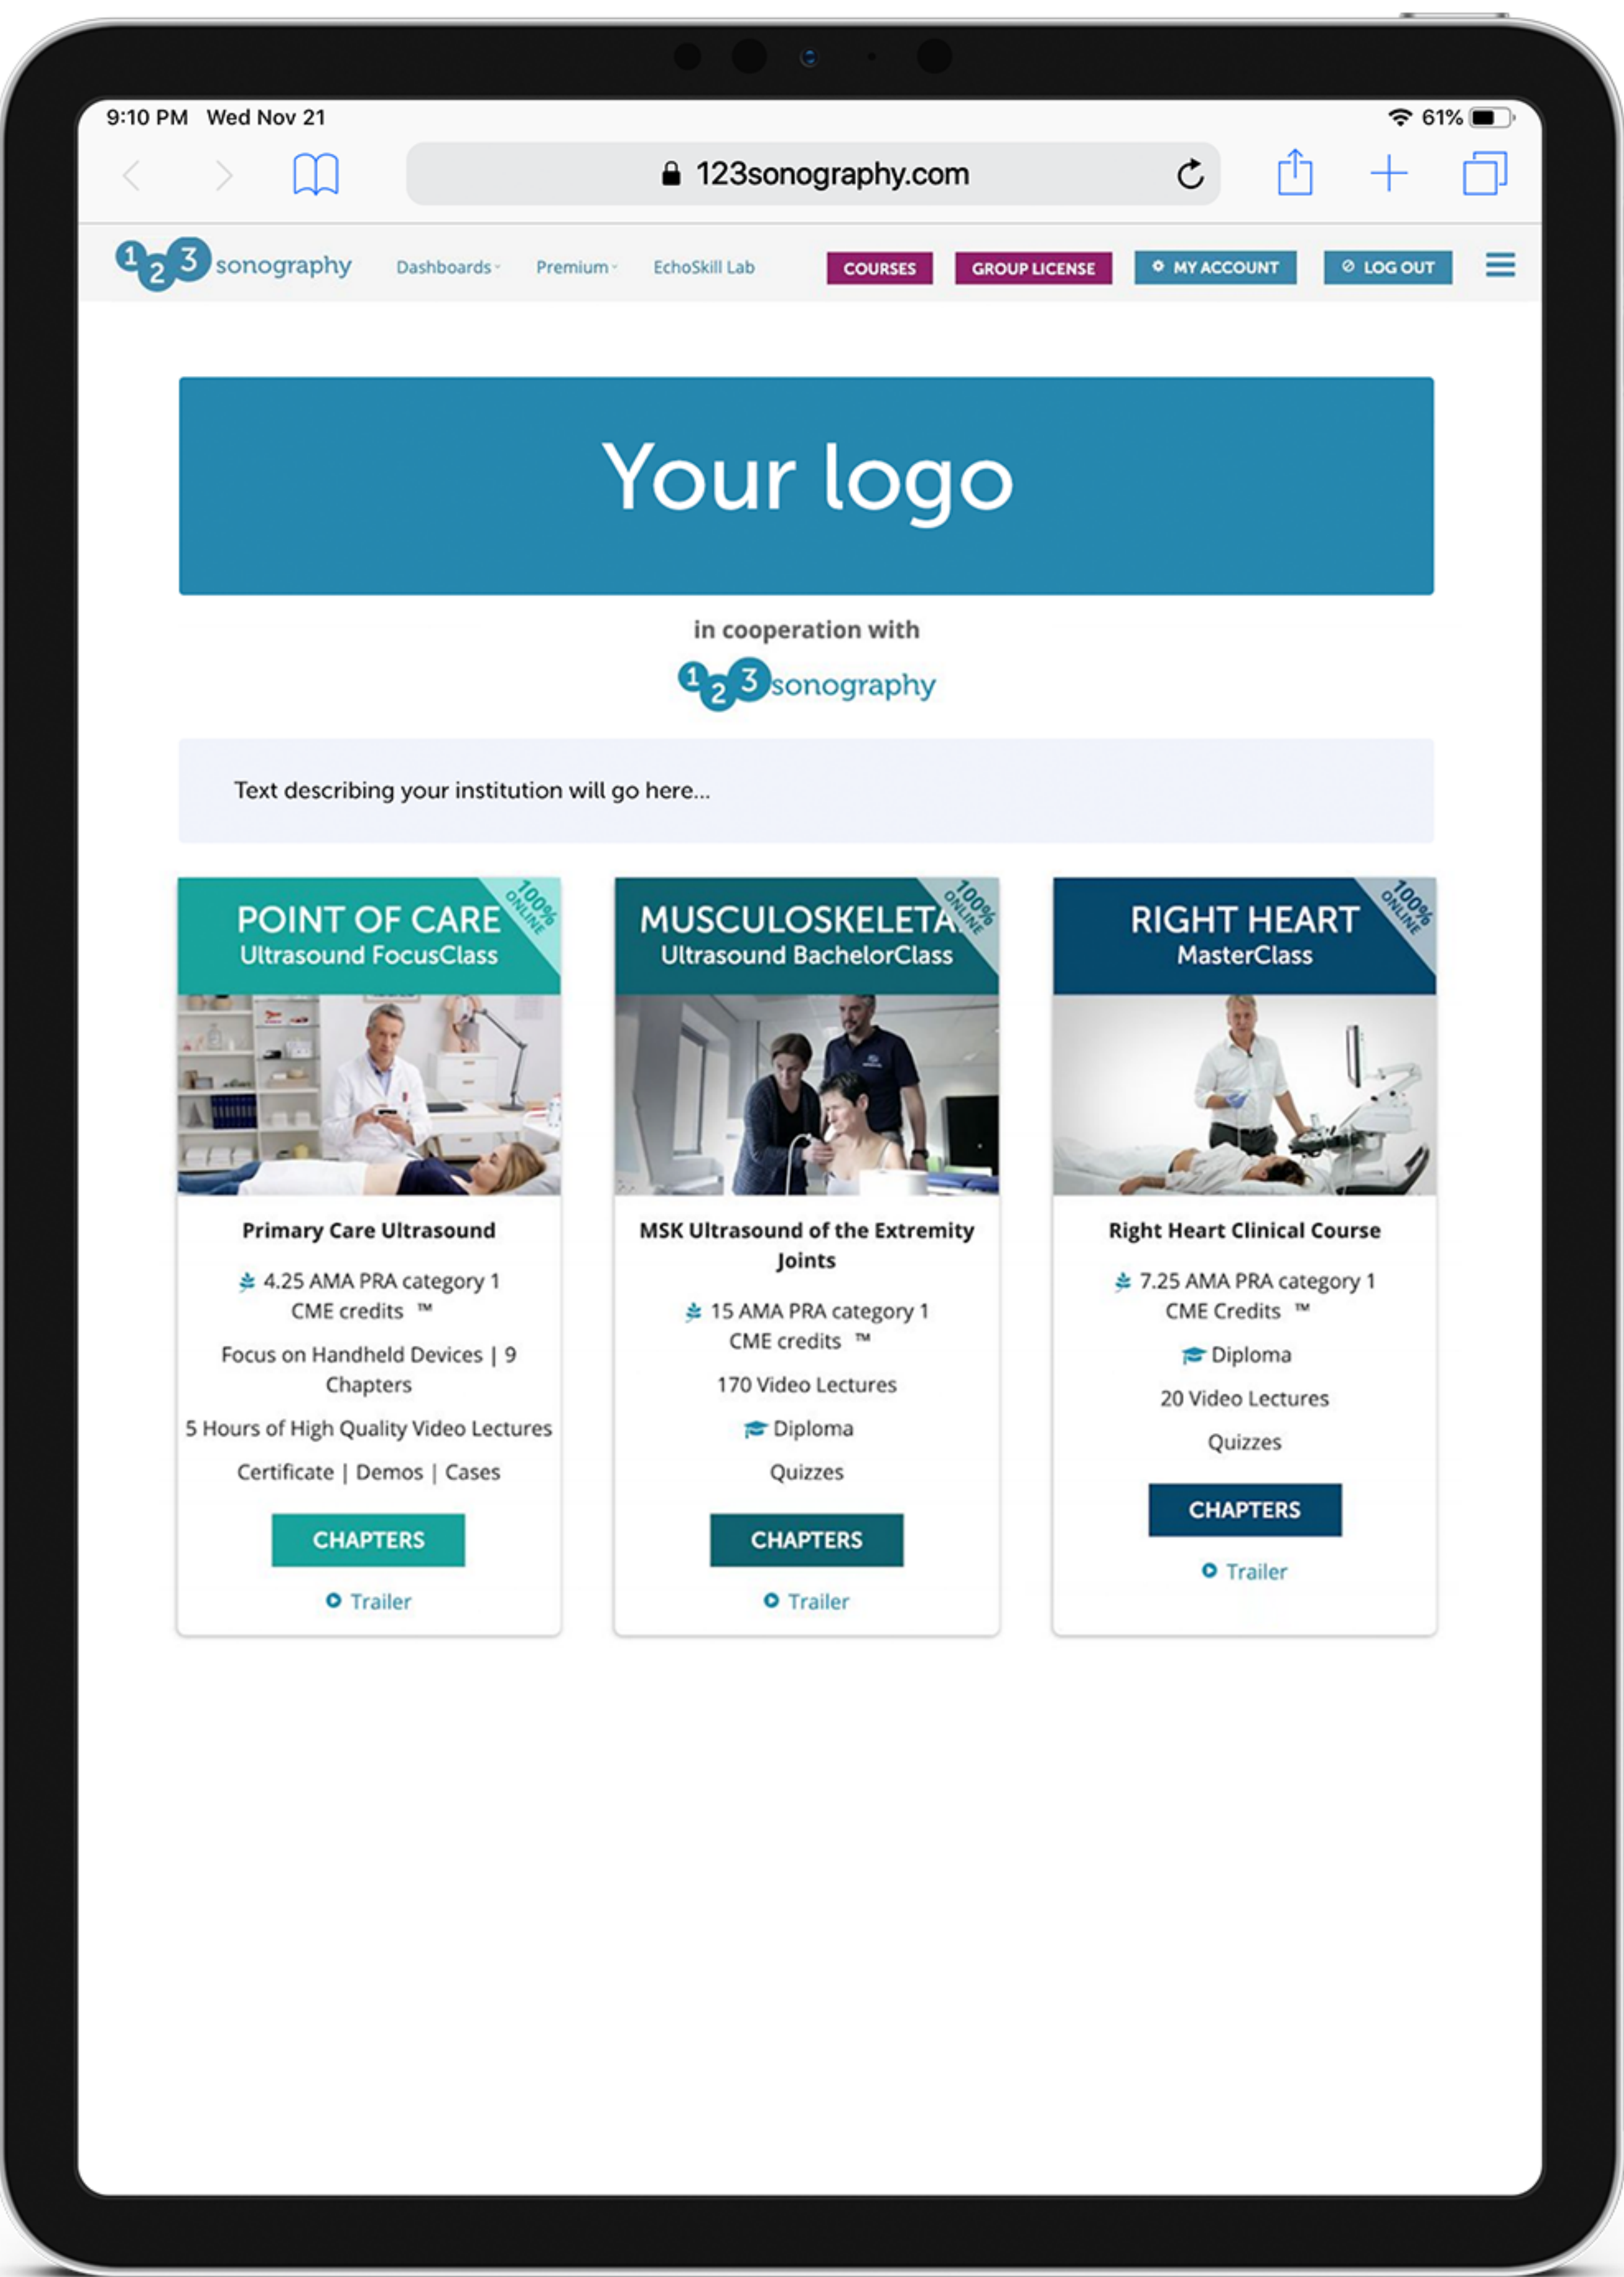

- See contract details
- Manage available licenses
- See your users’ licenses expiration date
- Assign licenses to your users via the simple web form for instant course access
- Download quiz stats to monitor your users’ progress (optional)

Benefits of the landing page include

- 123sonography Landing Page only for your users
- Your branding
- Customized user-interface

Admin page of your 123 Partner – Platform

Landing page of your 123Partner – Platform

" Tell me and I forget.
Teach me and I remember.
Involve me and I learn. **"**
